July 31, 2007

To Whom It May Concern:

Please allow this letter to confirm that Tanner Industries, Inc. has successfully passed NACD's 3rd-cycle on-site Responsible Distribution ProcessSM (RDP) Verification, demonstrating its commitment to the implementation of RDP's environmental, health, safety, and security (EHS&S) requirements. Tanner Industries is one of the first of fifteen NACD member companies to successfully pass RDP Verification in this cycle.

Successfully demonstrating implementation of EHS&S policies and procedures under RDP's Code of Management Practice to an independent third-party verifier has been a condition of membership in NACD since 1997. RDP Verification (RDPV) is required once every thirty-six months.

In keeping with RDP's goal for continuous improvement, significant enhancements were incorporated into this 3rd-cycle on-site RDP Verification process. RDP Verification is and has been management systems-based, and now also addresses operationally-based EHS&S issues applicable to the site being verified.

If you have any questions, please call me at 703-527-NACD (6223).

Sincerely,

Christopher L. Jahn
President & COO
